

SEED ROUND

Decentralized Asset Management SIMPLIFIED

Created by: Vingt.io
Dated: 6/2025

Vingt.io is an AI-powered platform for asset management, offering optimized trades and access to index and leverage tokens, all within a single dApp for quick, one-click investing.

Core Issue

Problem Statement

Managing assets and mitigating risk has become unnecessarily complex.

Fragmented holdings

Assets held on multiple platforms complicate management

Scattered Liquidity

Liquidity dispersion increases costs and delays transactions.

Complex Portfolios

Inefficient asset management drives unnecessary transactions, transactions, increasing complexity.

Security Risks

Using multiple platforms exposes users to security vulnerabilities.

Centralized Dependency

Centralized platforms create risks and limit asset control.

Action Plan

Solution

Vingt.io simplifies asset management and risk reduction, making the process straightforward and effective.

AI-Driven Management

Optimize and automate asset management with smart agents, reducing risk and increasing returns.

One-Stop Solution

Consolidate all asset management needs in one platform.

Best Trade Routes

Optimize trade routes reducing costs and speeding up transactions.

Self-Custody & Security

Maintain full control of assets with secure, decentralized protocols.

Intuitive Interface

Easily navigate portfolio with a simple, user-friendly interface.

Revenue Opportunity

Market Opportunity

📊 Trends Supporting Growth

Institutional Adoption:

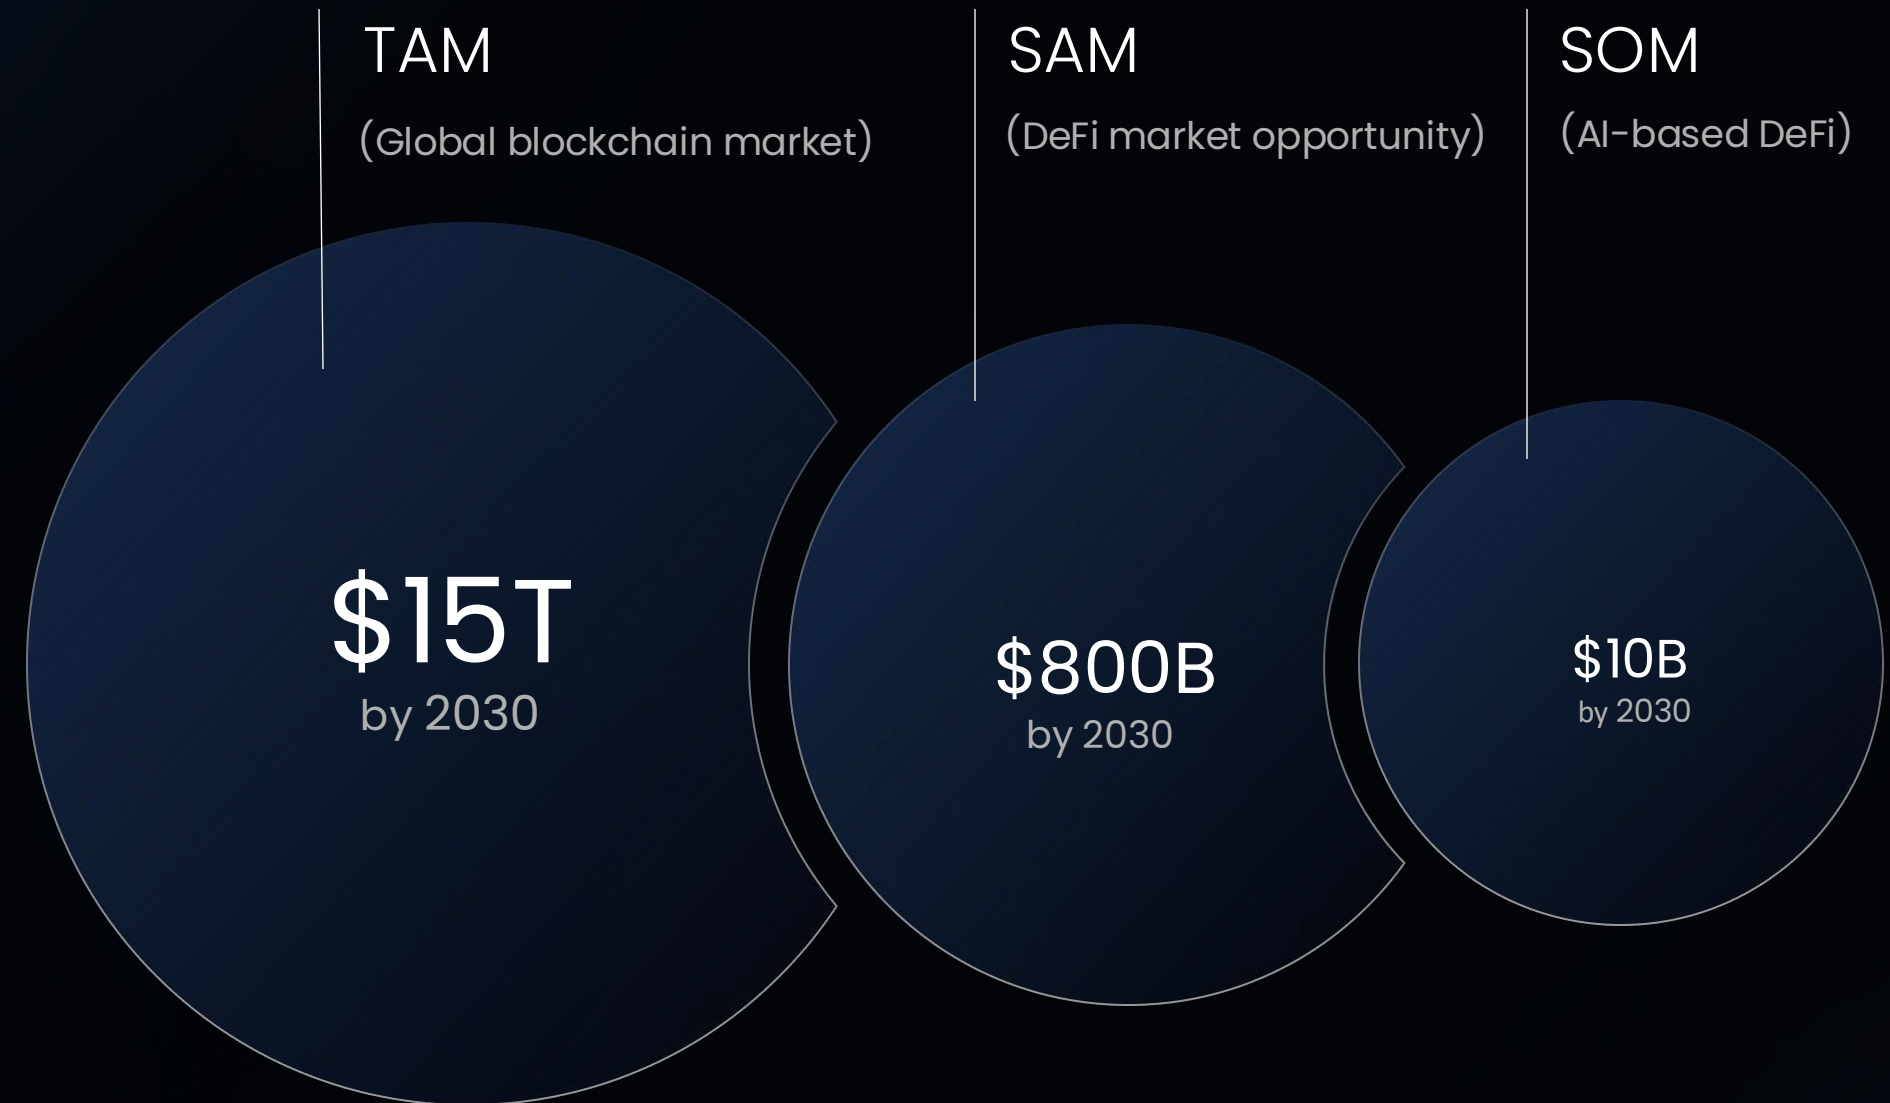

Major players like PayPal and JPMorgan entering digital asset management.

AI Integration:

Rising use of AI for automated trading and portfolio optimization.

Expanding User Base:

Growing demand from users seeking more efficient, decentralized asset management solutions.

ZeroLiq Dex

Token swaps with
minimal slippage

Volar Wallet

Secure Web3
asset management.

Vingt Labs

Incubating AI and DeFi
innovations.

Index and Strategy

VISP (Vingt.io Index and Strategy Protocol)

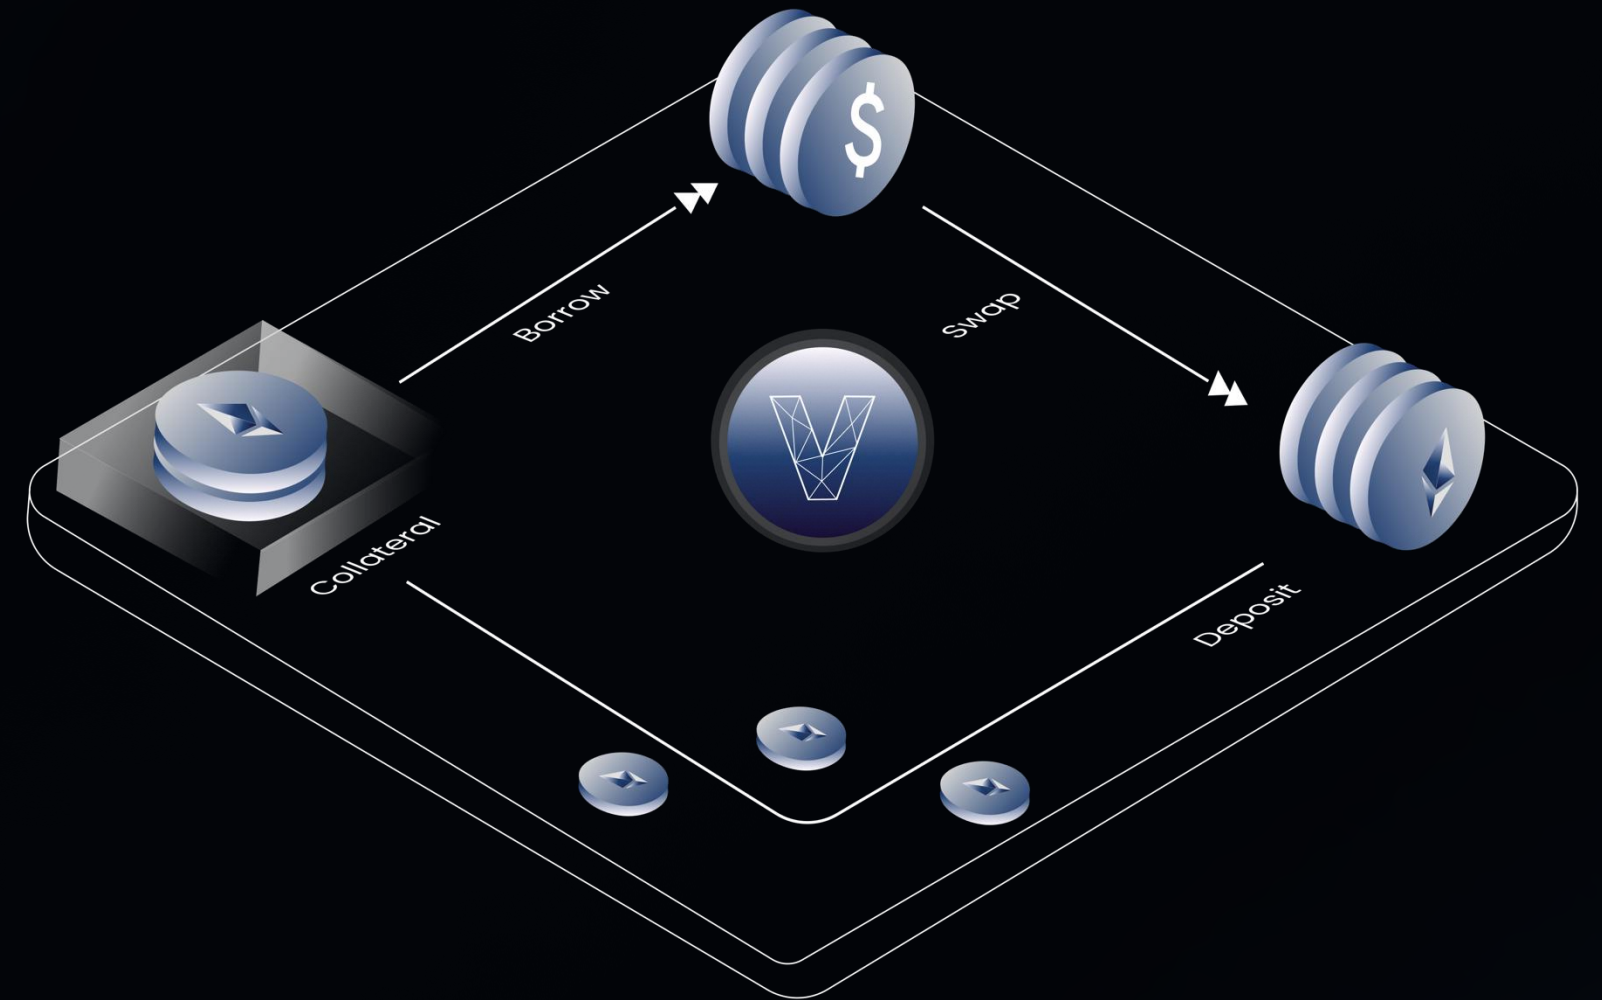

A protocol for automating portfolio management and adjusting strategies in real-time to optimize asset performance.

Index Tokens

Diversified, low-risk portfolios in a single token, offering instant exposure to multiple assets with minimal complexity.

Leverage Suite

Amplify returns with controlled leverage for BTC and ETH, enabling long and short positions in one powerful suite.

Leverage Suite Overcollateralized Position on AAVE protocol

Ecosystem Integration

Vingt.io dApp

A unified dApp offering access to the entire Vingt.io ecosystem, simplifying investment and asset management with efficient, one-click functionality.

Volar Wallet

Secure wallet for self-custody and asset management, acting as the core hub Web3 for all ecosystem components.

AI Smart Agents

Personalized portfolio management with real-time risk assessment, adapting strategies to market changes.

ZeroLiq DEX

Decentralized exchange for optimal trading and liquidity aggregation with low slippage, high efficiency.

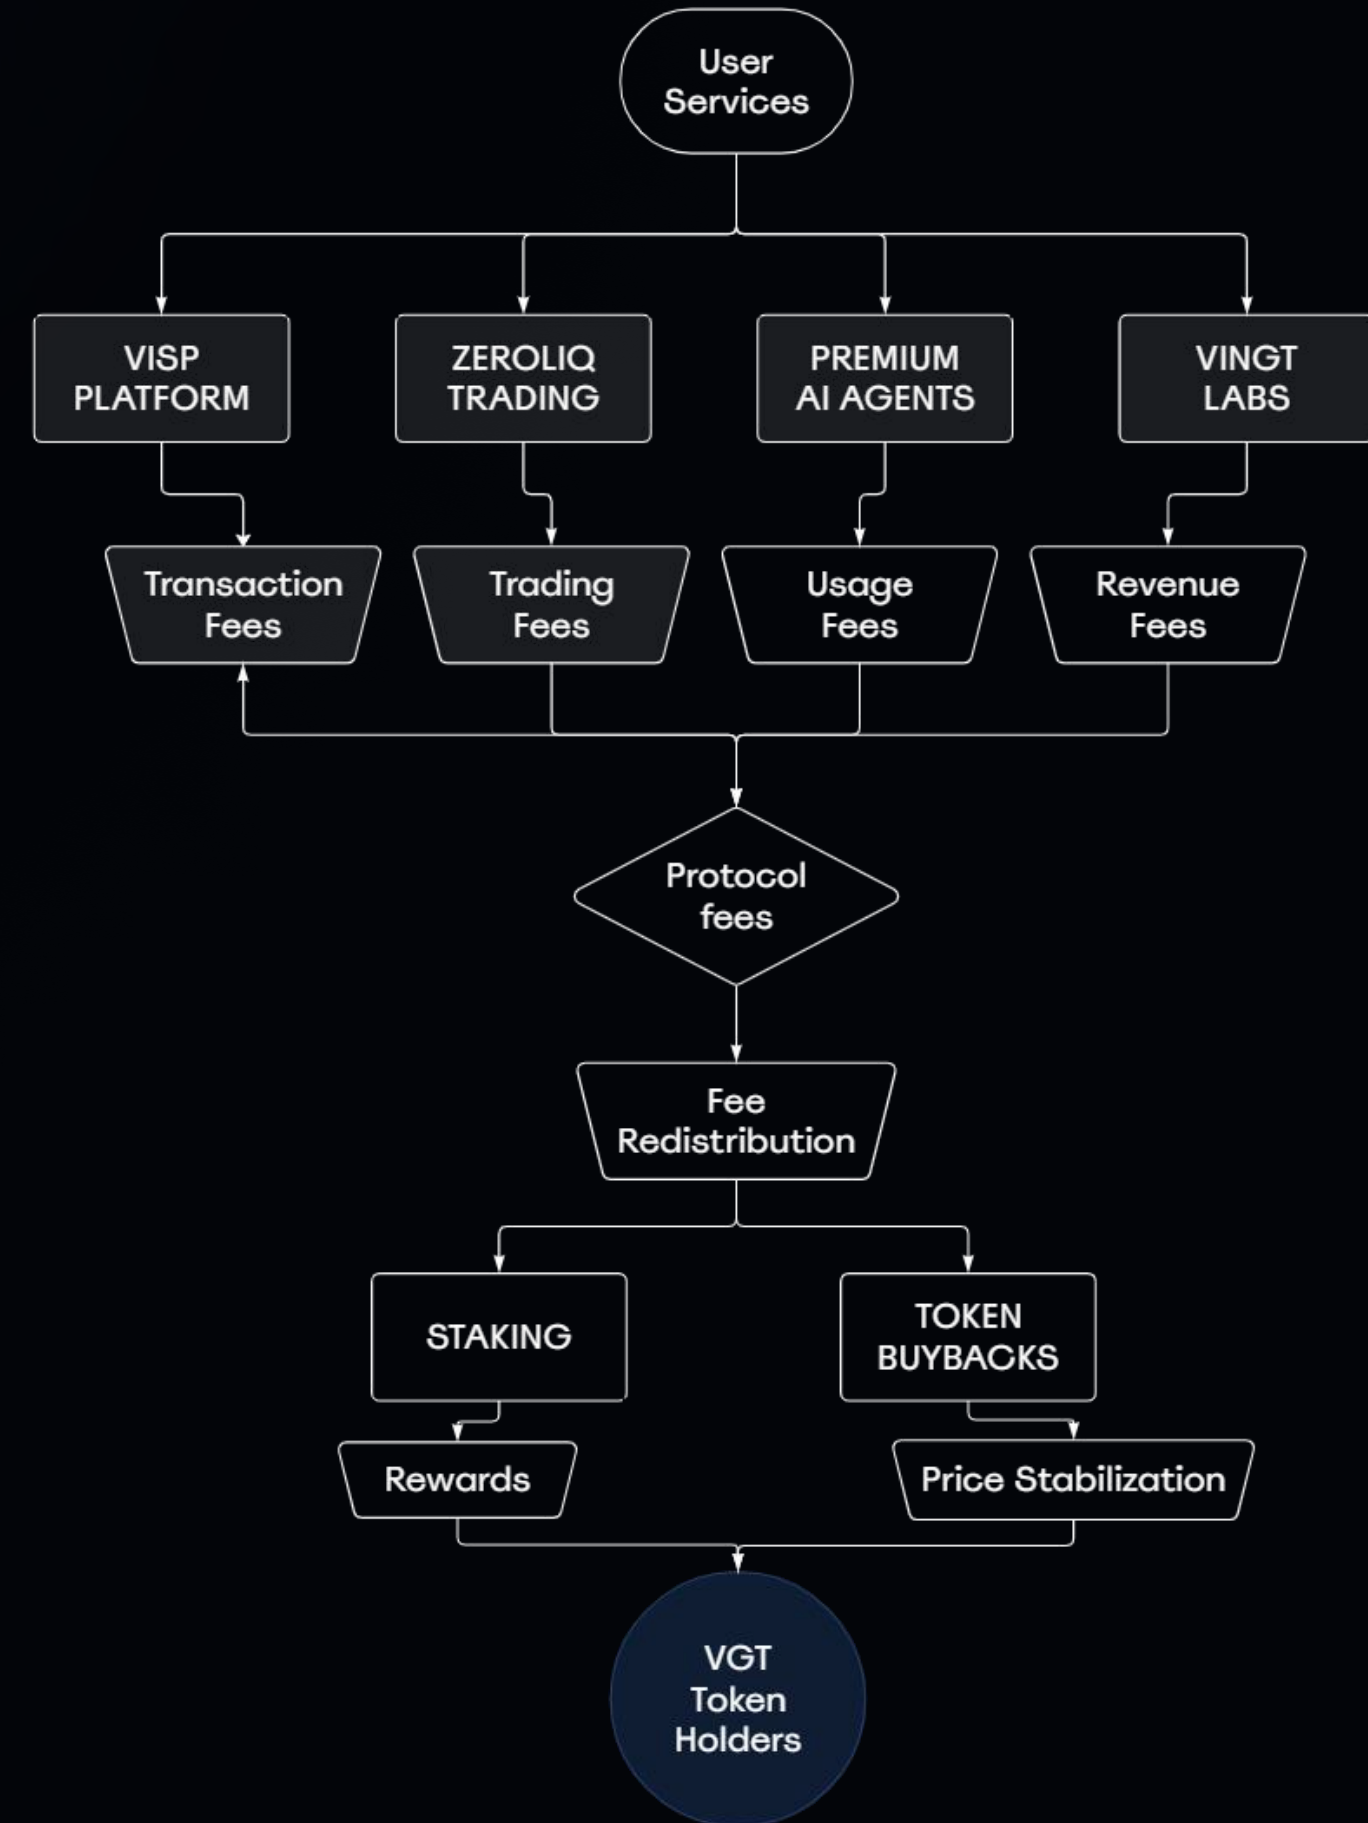

Vingt.io dApp User Interface

Token Value Flow

Ecosystem Value flow

A circular cash flow to support long-term sustainability and benefit the ecosystem and users.

Ecosystem value flow generates fees that are redistributed.

Future Outlook

Roadmap

Achievements (2022-2025):

- Raised **\$130k**, built website & dApp
- Developed VISP Protocol & index tokens (BSK, PLT, SIT)
- Launched leverage suite (ETH & BTC) on Arbitrum
- **Flash Mint** for efficient trading
- 15k+ community followers

Q3 – 2025:

- Complete **\$600k** seed round. Develop AI Smart Agents for portfolio optimization.
- Grow **TVL** through user and project expansion.

Q4 – 2025:

- VGT Token Generation Event (TGE).
- Expand ecosystem with new strategies

Q1 – 2026:

- Release ZeroLiq DEX for seamless decentralized trading.
- Deploy AI Smart Agents for live portfolio management and strategy optimization.

Q2 – 2026:

- Launch Volar Web3 wallet.
- Continue growing TVL, liquidity, and AI capabilities

Use Cases

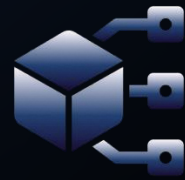

Token Utility

VGT powers the Vingt.io ecosystem, driving transactions, governance, premium features, and community engagement.

Protocol Governance

Empower users to vote on protocol upgrades and platform decisions.

Ecosystem Transactions

Serves as the currency for AI Smart Agents

Premium Features

Ecosystem tools, early project access, and VIP events.

Community Incentives

Reward referrals, content creation, and educational efforts.

Incentives,
Rewards And
User Growth

Vingt Reward Points (VRPs) drive engagement and are convertible to VGT after TGE. Staking VGT, Index and Leverage tokens rewards users and provides access to incubated projects. This reward-driven ecosystem enhances retention, liquidity, and ensures long-term growth.

CEO and Founder

Founder of Vingt.io Ecosystem

Masud Farshori

Electrical Engineering graduate from McGill University with 10+ years in crypto. Masud has played the key role in Vingt.io's evolution into an AI-driven DeFi ecosystem. His background in government-level audit and taxation adds strategic depth to the project's financial and operational design.

Partners & Backers

Vingt.io is incubated and accelerated by IBC/CJN Group

IBC Group

specializes in blockchain and AI, offering access to a global network of investors and advisors

Mario Nawfal

CEO of IBC Group, provides strategic support and mentorship

Asad Farshori

Ex Morgan Stanley, Ex RBS, Ex HSBC, Ex PWC

Yasir Raza

15+ Years of experience in Telecom, IT and AI technology

Sanam Humayun

Expert in capital raising , investor relations and high-value acquisitions

Jason Hung

Two decades of expertise in multinational corporations and blockchain startups
